Course Description

If you are interested in working within engineering as a motor vehicle repair technician, then this is the follow on course for you. This course will cover the foundation principles of:

- Health & Safety.
- Knowledge & Skills with tools in an automotive environment.
- Diagnose & rectify engine, chassis & electrical faults.
- Fitting & removal of non permanent body parts.
- Knowledge of inspection methods.
- Skills to identify customer service needs.
- Skills in how to make learning possible through demonstration & instruction.

How will the course be delivered?

This is a practical course and the sessions will include tutor-led demonstrations, instruction, online tests, phase tests, course work and repetition.

Will I need to study or practice outside the classroom?

It is always useful to practice your skills learned between sessions.

How will I know I'm making progress?

During the first session the tutor will discuss goals and current level in relation to the course. Based on this assessment, you will agree individual targets which you will record in your individual learning plan (ILP). You and your tutor will review your targets regularly to ensure that you are making progress; these will be written in your ILP

What will I need for the course?

Please come prepared with a note pad, pen and pencil. Any Personal Protective Equipment required will be supplied by Norpro Training.

Progression

Progression will be into employment, Apprenticeship Scheme in the engineering sector or further training. Look out for information regarding follow -on courses and other courses we provide. Visit our website at www.norprotraining.co.uk or contact us on 01752 559426
